Sub-Division Office of the Public Works Department. Thus, there is no convenient place anywhere in the town for the accommodation of travellers. It is therefore requested that a separate musafirkhana may kindly be built near the wall, just under construction, on the site where weekly *sante* is held.

Reply of Government.—It is not clear why the Amildar has been allowed to occupy a portion of the building constructed for the use of travellers, or why the Sub-Division Office is located in another portion. The President will be asked to call upon the Amildar to vacate the building at once. The Public Works Department office also will be removed.

SUBJECT No. 485.

Construction of a bridge at Kellodu across the Vedavati river.

Messrs. P. Nagappa, Khasim Sab, Hosdurga Taluk, and Gopalaiya, Chitaldrug District Board.

Summary of discussion.—After the formation of Hosdurga Taluk with the addition of the Budihal Hobli of the late Huliyar Sub-Taluk, there has been considerable traffic on the Hosdurga-Huliyar road. But the communication with the villages on the Budihal side is being cut off for days together by the Vedavati river during floods near Kollodu, a distance of four miles from Hosdurga. It is therefore proposed that a bridge may be constructed across the river at the place mentioned above. Though the project is a costly one, it is very necessary to execute the work early both for the convenience of the public and of Government. Tolls may be collected after the completion of the bridge to recoup the amount spent on it.

Reply of Government.—Will be considered when funds are available.

SUBJECT No. 486.

Removal of the Local Fund Dispensary at Harihar to the Anglo-Vernacular School there and the construction of a separate and more spacious building for the latter outside the town

Mr. B. Adivappa, Municipal Board Member, Harihar.

Summary of discussion.—The Local Fund Dispensary at Harihar has been located in a rented building situated in an unsuited locality for the past eighteen years at an annual rent of Rs. 60. People do not freely resort to it for medical aid. As proper Government building is very necessary for the Dispensary, the present Anglo-Vernacular school building, which is not sufficiently accommodative for the purpose, may be utilized for the Dispensary and a more spacious building constructed for the school outside the town. When this representation was made last year, the Government replied that this was a question of funds. Owing to the revision settlement introduced into this Sub-Taluk, there was an increase of six or seven thousand rupees under local and irrigation cesses collected last year on the revised assessment. Therefore the construction of the building may be ordered to be undertaken-the charges being met from the source pointed out.

Reply of Government.—Will be considered as early as funds permit.
